Core Question 1: Is the educational program a success?

Expanded Criteria

Overview

The Academic Performance Framework gauges the academic success of schools in serving their target populations and closing the achievement gap in Indianapolis.

The framework consists of seven indicators designed to measure schools on how well their students perform and grow on standardized testing measures, attendance, and school-specific measures that capture how well the school is meeting its individual mission.

Collecting Evidence

In order to use the framework throughout the school year, OEI will need the following:

- IDOE Accountability Report Card
- ISTEP+ Results
- iREAD-3 Results
- DOE-ME Reports
- Quarterly Attendance Reports
- Benchmark & Formative Assessment Data
- Student Level Demographic Data

Evaluation

OEI will continue to evaluate and rate schools' performance on an annual basis against the academic performance framework. We will have quarterly visits where we focus on the benchmark data in order to predict performance and make mid-course corrections as necessary.

Schools determined to be in academic distress will be subject to additional monitoring and/or corrective action at the discretion of OEI staff.

Core Question 1: Is the educational program a success? Elementary/Middle School Expanded Criteria

Core Question 2: Is the organization in sound fiscal health? Expanded Criteria

Overview

The Financial Performance Framework gauges both near term financial health and longer term financial sustainability while accounting for key financial reporting requirements.

The portion of the framework that tests a school's near term financial health is designed to depict the school's financial position and viability in the upcoming year and used to monitor progress quarterly. Schools meeting the desired standards demonstrate a low-risk of financial distress in the coming year. Schools that fail to meet the standards may currently be experiencing financial difficulties and/or are at high risk for financial hardship in the near term. These schools may require additional review and immediate corrective action on the part of the Mayor's Office.

The portion of the framework that tests a school's longer term financial sustainability is designed to depict a school's financial position and viability over time. Schools meeting the desired standards demonstrate a low-risk of financial distress in the future. Schools that fail to meet the standards are at high risk for financial hardship in the future.

Collecting Evidence

In order to use the framework each year, the Mayor's Office will need the following:

- Audited Statement of Net Assets (Balance Sheet)
- Audited Statement of Activities (Income Statement)
- Notes to the Audited Financial Statements (Part of audit)
- Charter school board approved budgets with ADM enrollment targets from the school
- Annual Debt schedule, indicating the total principal and interest due each year (from the school)

Evaluation

The Mayor's office will continue to evaluate and rate schools performance on an annual basis against the financial performance framework. We will utilize the audited financial statements from the annual accrual based audit to evaluate health. We will also continue to have quarterly visits where we focus on the short term indicators from the unaudited financial statements received for that quarter.

Schools determined to be in immediate financial distress will be subject to additional monitoring and/or corrective action at the discretion of the Mayor's Charter School Office. It is critical that the school Financial Manager and the Board have a strong understanding of the school's financial health as we move from a qualitative to a quantitative framework.

Core Question 2: Is the organization in sound fiscal health?

Expanded Criteria

2.1. Short Term Health: Does the school demonstrate the ability to pay its obligations in the next 12 months?	
Does not meet standard	The school does not meet standard for 2 or more of the following sub-indicators: : Enrollment Variance, February Enrollment Variance, Current Ratio, Days Cash on Hand and Debt Default
Approaching standard	The school approaches standard for all of the following sub-indicators: Enrollment Variance, February Enrollment Variance, Current Ratio, Days Cash on Hand and Debt Default <u>OR</u> The school meets standard for 3 of the sub-indicators and approaches standard for the remaining 2 <u>OR</u> The school meets standard for 4 of the sub-indicators and does not meet standard for the remaining 1
Meets standard	The school meets standard for 4 of the following sub-indicators and approaches standard for the remaining sub-indicator: Enrollment Variance, February Enrollment Variance, Current Ratio, Days Cash on Hand and Debt Default
Exceeds Standard	The school meets standard for all of the following sub-indicators: Enrollment Variance, February Enrollment Variance, Current Ratio, Days Cash on Hand and Debt Default

We will use the most recent amendment to calculate as long as the amendment was completed prior to the school year starting.

a) Enrollment Variance Ratio

- **Definition:** The enrollment variance ratio tells authorizers whether or not the school is meeting its enrollment projections in its charter, thereby generating sufficient revenue to fund ongoing operations.
- **Overview:** Enrollment is typically the largest source of revenue for a school. If a school is consistently hitting their enrollment targets then they are bringing in the amount of revenue they planned for in their budget. If the school is consistently not meeting its enrollment targets then the school will need to adjust its spending to reflect the reduced amount of revenue.
- **Data Source:** Projected enrollment from the charter agreement and actual enrollment from the Department of Education
- **Calculation:** Actual Enrollment/ Projected Enrollment

Does not meet standard	Enrollment Ratio is less than or equal to 89%
Approaching standard	Enrollment Ratio is between 90% - 98%
Meets standard	Enrollment Ratio equals or exceeds 99%

b) **February Count Day Enrollment Variance Ratio**

- **Definition:** The February count day enrollment variance ratio looks at what percentage of the student body was retained between the September count and the February count.
- **Overview:** It is important for schools to continue to serving the same or nearly the same number of students throughout the year for a number of academic reasons. Since the February count day will influence funding for the first semester of the coming year, schools should be retaining enough of the student population between September and February that will make them likely to be able to serve roughly the same number of students in the coming academic year.
- **Data Source:** September enrollment as reported by the Department of Education and February enrollment as reported by the Department of Education
- **Calculation:** February Enrollment/September Enrollment

Does not meet standard	Enrollment Ratio is less than or equal to 89%
Approaching standard	Enrollment Ratio is between 90% - 95%
Meets standard	Enrollment Ratio equals or exceeds 95%

c) **Current Ratio**

- **Definition:** The current ratio depicts the relationship between a school's current assets (what they own) and current liabilities (what they owe).
- **Overview:** Current is defined as within the next twelve months. If the current ratio is 1.1 or greater then a school owns more than it owes in the short term. If the school owns more than it owes, then it has a good chance of meeting its obligations. If a school owes more than it owns, then it may not be able to meet its obligations.
- **Data Source:** Audited statement of net assets
- **Calculation:** Current Assets/ Current Liabilities

Does not meet standard	Current Ratio is less than or equal to 1.0
Approaching standard	Current Ratio is between 1.0 - 1.1
Meets standard	Current Ratio equals or exceeds 1.1

d) Days Cash on Hand

- **Definition:** Days cash on hand indicates how many days a school can pay its expenses without another inflow of cash.
- **Overview:** Best practice indicates a school should have between 30-60 days cash on hand to cover unexpected expenses. This is particularly important given the cyclical nature of cash inflows and the restricted nature of many of the funds school use throughout the year.
- **Data Source:** Audited statement of net assets (checking/savings account balance) and audited statement of activities (Total Expenses, Depreciation and Amortization)
- **Calculation:** $\text{Cash} / ((\text{Total Expenses} - \text{Depreciation-Amortization})/365)$

Does not meet standard	Days Cash on Hand is less than or equal to 30 days
Approaching standard	Days Cash on Hand is between 30-45 days
Meets standard	Days Cash on Hand equals or exceeds 45 days

For schools in year one and year two of operation we are looking for 30 days cash on hand to either meet or not meet the standard.

e) Debt Default

- **Definition:** Debt default indicates if a school is not meeting debt obligations or covenants.
- **Overview:** Schools must meet all requirements when servicing debt and complying with other covenants as set forth in their agreements
- **Data Source:** Notes to the audited financial statements
- **Calculation:** Review of notes to the financial statements in the accrual based audit

Does not meet standard	Default or delinquent payments identified
Meets standard	Not in default or delinquent

2.2. Long Term Health: Does the organization demonstrate long term financial health?

Does not meet standard	The school meets standard for 1 of the following sub-indicators but does not meet standard for the remaining 2 sub-indicators: a) 3 year Aggregate Net Income, b) Debt to Asset Ratio c) Debt Service Coverage Ratio OR The school does not meet standard for any of the sub-indicators
Approaching standard	The school meets standard for 2 of the following sub-indicators: a) 3 year Aggregate Net Income, b) Debt to Asset Ratio c) Debt Service Coverage Ratio OR The school approaches standard for all 3 sub-indicators
Meets standard	The school meets standard for 2 of the following sub-indicators and approaches standard for the remaining sub-indicator: a) 3 year Aggregate Net Income, b) Debt to Asset Ratio, and c) Debt Service Coverage Ratio
Exceeds standard	The school meets standard for all of the following sub-indicators: a) 3 year Aggregate Net Income, b) Debt to Asset Ratio, and c) Debt Service Coverage Ratio

a) Three Year Aggregate Net Income

- **Definition:** Net income measures the difference between a school's revenues and expenses (includes non-cash expenditures such as depreciation and amortization)
- **Overview:** Net income indicates whether a school operates with a surplus or a deficit in a given time period. Net income is important because schools cannot operate at a deficit for sustained periods of time without risk of closure. The three year aggregate net income is simply the sum of the net incomes for the most recent three years to understand if the school is generating a surplus in the long run.
- **Data Source:** Three Years of Audited Statements of Activity
- **Calculation:** Sum of Net Incomes for most recent three years

Does not meet standard	Aggregate three year Net Income is negative
Approaching standard	Aggregate three year Net Income is positive and most recent year is negative
Meets standard	Aggregate three year Net Income is positive and most recent year is positive

For schools in year one and year two of operation we are looking for positive net incomes each year.

b) **Debt to Asset Ratio**

- **Definition:** The debt to asset ratio measures the amount of liabilities a school owes versus the assets they own; it measures the extent to which the school relies on borrowed funds to finance its operations
- **Overview:** The debt to asset ratio is the long term version of the current ratio. It compares schools total assets to their total liabilities. This is a snapshot of how much as school owns vs. how much they owe in total. A lower debt to asset ratio generally indicates stronger health.
- **Data Source:** Audited statement of net assets
- **Calculation:** Total Liabilities/Total Assets

Does not meet standard	Debt to Asset Ratio equals or exceeds 0.95
Approaching standard	Debt to Asset Ratio is between 0.90 – 0.95
Meets standard	Debt to Asset Ratio is less than or equal to 0.90

c) **Debt Service Coverage Ratio**

- **Definition:** This ratio indicates a school's ability to cover its debt obligations in the next year based on its current net income.
- **Overview:** This measure depicts a schools ability to pay obligations once you add back the non-cash expenditure (depreciation) and add back in the interest expense since interest is one of the obligations we are trying to determine if a school can pay in the coming year. This is divided by the total Principal and Interest payments due in the coming year to understand if the income generated is enough to meet those obligations.
- **Sources of Data:** Audited statement of activity, and debt schedule detailing interest and principal payments for the coming years (provided by the school)
- **Calculation:** (Net Income + Depreciation+ Amortization + Interest Expense) / (Principal + Interest Payments for the next year)

Does not meet standard	Debt Service Coverage ratio is less than or equal to 1.05
Approaching standard	Debt Service Coverage ratio is between 1.05 – 1.20
Meets standard	Debt Service Coverage ratio equals or exceeds 1.20

2.3. Does the organization demonstrate it has adequate financial management and systems?

Approaching standard	The school meets standard for one one the following sub-indicators but approaches standard for the remaining sub-indicator: a) Financial audit b) Financial Reporting Requirements
Meets standard	The school meets standard for both of the following sub-indicators: a) Financial Audit and Financial Reporting Requirements

a) **Financial Audit**

- **Overview:** The annual accrual based audit provides an opinion on the validity of the information being shared in the financial statements and provides insight into school's financial health
- **Sources of Data:** Annual accrual based audit document

Does not meet standard	Receives an audit with multiple significant deficiencies, material weakness or is a going concern
Approaching standard	Receives a clean audit opinion with a few significant deficiencies noted but no material weaknesses
Meets standard	Receives a clean audit opinion

b) **Financial Reporting Requirements**

- **Definition:** Schools need to turn in all financial documents in a timely manner
- **Overview:** Reporting requirements are critical in ensuring the ongoing monitoring of health
- **Sources of Data:** Financial Analyst, Audit Firm, Accounting Firm and others
- **Calculation:** OEI reserves the right to consider the following when determining that a school does not meet standard for financial reporting requirements:
 - Late submission (or failure to submit) quarterly financial statements
 - Late submission of (or failure to submit) the annual accrual based audit relative to OEI, SBOA, or Federal OMB deadlines
 - Cancellation of compliance meetings with OEI for non-emergency reasons and/or failure to reschedule meetings canceled for any reason

Does not meet standard	Fails to satisfy financial reporting requirements
Meets standard	Satisfies all financial reporting requirements

Core Question 3: Is the organization effective and well-run?

Expanded Criteria

Overview

The Governance and Leadership Performance Framework gauges the success of the school leadership and board of directors in providing the students at the school with a high quality education while adhering to the charter agreement and other applicable laws.

The framework consists of five indicators that are designed to measure school and board leadership, organizational effectiveness, competency in processes and oversight, and compliance with the charter and applicable laws.

Collecting Evidence

In order to use the framework as an evaluation tool throughout the school year, the Mayor's Office will utilize and assess the following:

- Compliance Reports and Letters
- Employee Documentation
- Review Meetings (with school and board leaders)
- Board Meetings (including agendas, packets, reports, notes, and submitted minutes)
- Evaluation and Survey Results
- Additional, where necessary (see "Data Sources" below)

Evaluation

The Mayor's office will continue to evaluate and rate schools' performance on an annual basis against the governance and leadership performance framework. We will visit throughout the year with both school leaders and board presidents, and will attend board meeting and school events, where we assess the information available to determine current and future performance, and make mid-course corrections as necessary.

Schools determined to have challenges in the area of governance and leadership will be subject to additional monitoring and/or corrective action at the discretion of the Mayor's Charter School Office.

Core Question 4: Is the school providing the appropriate conditions for success?

Expanded Criteria and Vendor Information

Overview

The site visit framework assesses the processes and systems that impact a school's academic, financial and governance outcomes in Core Questions 1, 2 and 3.

During the term of its initial charter, a school receives a site visit that culminates in an evaluation against Core Question 4 in the second, fourth and sixth years. The fourth-year comprehensive review culminates in a school's mid-charter review, while the sixth year visit serves to inform charter renewal decisions.

Collecting Evidence

Schools select a pre-approved external consultant to conduct a site visit. During that process, the consultants provide a list of procedures that includes: materials to collect, staff, students, parents, and board members to be interviewed, and a protocol/agenda as to what the school can expect to occur. All consultants have been vetted and pre-approved by the Mayor's Office and have demonstrated sufficient expertise to conduct site visits.

Evaluation

The external evaluators complete evaluations of all Mayor-sponsored charter schools against Core Question 4. All consultants are required to use the language and criteria specifically outlined in Core Question 4 to allow for consistency across evaluations. The Office of Education Innovation will publish completed external evaluations in its annual Accountability Reports.
